OWN A HOME OF YOUR OWN We know it is the desire of everyone to own a home of his own, and, even though the decision may not be made immediately, there is hardly a man or a woman in the community but who would like to look over plans and make a selection of what they would like to build in the future. With this end in view, we have compiled this beautiful book, and we know it will be of great interest and we hope of considerable pleasure to you.

WE ILLUSTRATE IN THIS BOOK the perspective view and floor plans of 95 low and medium-priced houses. In the preparation of this work great care has been exercised in the selection of original, practical and attractive house designs, such as seventy-five to ninety per cent of the people today wish to build. In drawing these plans special effort has been made to provide for the MOST ECONOMICAL CONSTRUCTION, thereby giving the home builder and contractor the benefit of the saving of many dollars; for in no case have we put any useless expense upon the building simply to carry out some pet idea. Every plan illustrated will show, by the complete working plans and specifications, that we give you designs that will work out to the best advantage and will give you the most for your money; besides every bit of space has been utilized to the best advantage.

$100.00 PLANS FOR ONLY $10. This Association has for its foundation the best equipped architectural establishment ever maintained for the purpose of furnishing the public with complete working plans and specifications at the remarkably low price of only $10 to $15 per set. Every plan we illustrate has been designed by a licensed architect, who stands at the head of his profession in this particular class of work and has made a specialty of low and medium-priced houses. The price usually charged for this work is from $50.00 to $75.00.

WHAT WE GIVE YOU The first question you will ask is, "What do we get in these complete working plans and specifications? Of what do they consist? Are they the cheap printed plans on tissue paper without details or specifications?" We do not blame you for wishing to know what you will get for your money.

BLUE PRINTED WORKING PLANS The plans we furnish are the regular blue printed plans, drawn one-quarter inch scale to the foot, showing all the elevations, floor plans and necessary interior details. All of our plans are printed by electricity on an electric circular blue-printing machine, and we use the very best grade of electric blue-printing paper; every line and figure showing perfect and distinct.

FOUNDATION AND CELLAR PLANS This sheet shows the shape and size of all walls, piers, footings, posts, etc., and of what materials they are constructed; shows the location of all windows, doors, chimneys, ash-pits, partitions, and the like. The different wall sections are given, showing their construction and measurements from all the different points.

FLOOR PLANS These plans show the shape and size of all rooms, halls and closets; the location and size of all doors and windows; the position of all plumbing fixtures, gas lights, registers, pantry work, etc., and all the measurements that are necessary are given.

ELEVATIONS A front, right, left and rear elevation are furnished with all the plans. These drawings are complete and accurate in every respect. They show the shape, size and location of all doors, windows, porches, cornices, towers, bays, and the like; in fact, give you an exact scale picture of the house as it should be at completion. Full wall sections are given showing the construction from foundation to roof, the height of stories between the joists, height of plates, pitch of roof, etc.

ROOF PLANS This plan is furnished where the roof construction is at all intricate. It shows the location of all hips, valleys, ridges, decks, etc. All the above drawings are made to scale one-quarter inch to the foot.

DETAILS All necessary details of the interior work, such as door and window casings and trim, base, stools, picture moulding, doors, newel posts, balusters, rails, etc., accompany each set of plans. Part is shown in full size, while some of the larger work, such as stair construction, is drawn to a scale of one and one-half inch to the foot. These blue prints are substantially and artistically bound in cloth and heavy water-proof paper, making a handsome and durable covering and protection for the plans.

SPECIFICATIONS The specifications are typewritten on Lakeside Bond Linen paper and are bound in the same artistic manner as the plans, the same cloth and water-proof paper being used. They consist of from about sixteen to twenty pages of closely typewritten matter, giving full instructions for carrying out the work. All directions necessary are given in the clearest and most explicit manner, so that there can be no possibility of a misunderstanding.

BASIS OF CONTRACT The working plans and specifications we furnish can be made the basis of contract between the home builder and the contractor. This will prevent mistakes, which cost money, and they will prevent disputes which are unforseen and never settled satisfactorily to both parties. When no plans are used the contractor is often obliged to do some work he did not figure on, and the home builder often does not get as much for his money as he expected, simply because there was no basis on which to work and upon which to base the contract.

NO MISUNDERSTANDING CAN ARISE when a set of our plans and specifications is before the contractor and the home builder, showing the interior and exterior construction of the house as agreed upon in the contract. Many advantages may be claimed for the complete plans and specifications. They are time savers and, therefore, money savers. Workmen will not have to wait for instructions when a set of plans is left on the job. They will prevent mistakes in cutting lumber, in placing door and window frames, and in many other places where the contractor is not on the work and the men have received only partial or indefinite instructions. They also give instructions for the working of all material to the best advantage.

WITHOUT ONE CENT OF COST TO YOU and without one particle of trouble, we keep a record of the number of the house design and the date it was furnished, so that, in time of loss, all it will be necessary for you to do is to drop us a line and we will furnish the only reliable method of getting a speedy and satisfactory adjustment. This may be the means of saving you hundreds of dollars, besides much time and worry.

OUR LIBERAL PRICES Many have marveled at our ability to furnish such excellent and complete working plans and specifications at such low prices. We do not wonder at this, because we charge but $10.00 to $15.00 for a more complete set of working plans and specifications than you would receive if ordered in the ordinary manner, and when drawn especially for you, at a cost of from fifty to seventy-five dollars. On account of our large business, great organization and unusual equipment, and owing to the fact that WE DIVIDE THE COST of these plans among so many, it is possible for us to sell them at these low prices. The margin of profit is very close, but it enables us to sell thousands of sets of plans, which save many times their cost to both the owner and the contractor in erecting even the smallest dwelling.

BILL OF MATERIAL We do not furnish a bill of material. We state this here particularly, as some people have an idea that a bill of material should accompany each set of plans and specifications. In the first place, our plans are gotten up in a very comprehensive manner, so that any carpenter can easily take off the bill of material without any difficulty. We realize that there are hardly two sections of the country where exactly the same kinds of materials are used, and, moreover, a bill which we might furnish would not be applicable in all sections of the country. We furnish plans and specifications for houses which are built as far north as the Hudson Bay and as far south as the Gulf of Mexico. They are built upon the Atlantic and Pacific Coasts, and you can also find them in Australia and South Africa. Each country and section of a country has its peculiarities as to sizes and qualities; therefore, it would be useless for us to make a list that would not be universal. Our houses, when completed, may look the same whether they are built in Canada or Florida, but the same materials will not be used, for the reason that the customs of the people and the climatic conditions will dictate the kind and amount of materials to be used in their construction.

WE WISH TO BE FRANK WITH YOU and therefore make no statement that we cannot substantiate in every respect. If a plan in this book pleases you; if the arrangement of the rooms is satisfactory, and if the exterior is pleasing and attractive, then we make this claim—that it can be built as cheaply as if any other architect designed it, and we believe cheaper.

WE HAVE STUDIED ECONOMY and our knowledge of all the material that goes into a house qualifies us to give you the best for your money. We give you a plan that pleases you, one that is attractive, and one where every foot of space is utilized at the least possible cost. Can any architect do more, even at seven to ten times the price we charge you for plans?

REVERSING PLANS We receive many requests from our patrons for plans exactly according to the designs illustrated, with the one exception of having them reversed or placed in the opposite direction. It is impossible for us to make this change and draw new plans, except at a cost of about eight times our regular price. We see no reason why our regular plans will not answer your purpose. Your carpenter can face the house exactly as you wish it, and the plans will work out as well facing in one direction as in another. We can, however, if you wish, and so instruct us, make you a reversed blue print and furnish it at our regular price; but in that case all the figures and letters will be reversed and, therefore, liable to cause as much confusion as if your carpenter reversed the plan himself while constructing the house.

WE WOULD ADVISE however, in all cases where the plan is to be reversed, and there is the least doubt about the contractor not being able to work from the plans as we have them, that two sets of blue prints be purchased, one regular and the other reversed, and in such cases we furnish two sets of blue prints and one set of specifications for only fifty per cent added to the regular cost, making the $10.00 plan cost only $15.00.

ALWAYS BUILD FROM PLANS It has become necessary within the last few years, in order to get a house with perfect lines and up-to-date style, to build from architect's plans. This has become necessary because style is essential, should the owner ever wish to sell his house.

A house built after our plans is sure to be artistic and can also be built at the least possible expense, because economy has been considered in every portion of the work. Never build without working plans and specifications, so that you may save in the cost of material and in the workingmen's time.

Build an artistic house and be able to dispose of it, and at a profit, should it become necessary for you to sell it any time.

NATIONAL ARCHITECTURAL ASSOCIATION

CHICAGO - - - NEW YORK

ESTIMATED COST OF HOUSES

LET us give you this advice in the matter of an estimate of the cost of any house in this book—consult the Responsible Lumber Dealer and Responsible Contractor in your own immediate neighborhood. They know all the conditions that enter as factors in the cost of a house in your locality. They know what labor costs, and all the other things that govern the price of materials. You will see readily that these are varying quantities and a price that might be true in one locality will not hold in another. We might give you a price, but it would not help you and might cause you embarrassment in addition to making ourselves ridiculous, because we do not know the conditions in your locality as the ResponsibleDealer and Responsible Contractor do.

So let us tell you this: If there is a house in this book that you want to build, the first thing to do is to consult the Responsible Dealer and Responsible Contractor. In all likelihood he is your friend and neighbor. You can depend on what he will tell you after he figures on the plan, for he has had the experience in your locality and knows the costs of all the materials that will be used in the house—knowledge of a specific nature that we do not possess, neither does any one else who is not on the ground.

We are perfectly honest and fair with you in this matter. This much we can tell you, however. In every locality it is safe to say there are seasons of the year when it will cost less to build than at others. It is for the Responsible Dealer and Responsible Contractor to direct you when it is the most opportune time to commence operations. The labor market varies. The cost of materials varies. These are things over which we have no control; nor have you.

Let us tell you this also—Never build or even think of doing so without plans. They will save you money and worry. This applies to all localities. The plans in this book have been prepared by the most skilled licensed architects in the country and one motive has actuated them—the most economy consistent with style and utility. The best this Association can tell you, therefore, in the matter of arriving at a satisfactory estimate is to consult the Responsible Dealer and Responsible Contractor in every case. They are thoroughly conversant with all the conditions that govern cost and are intimately familiar with the material market in your neighborhood. Having this estimate and the set of plans and specifications you will be safely on the road to the construction of your home—and success to you.

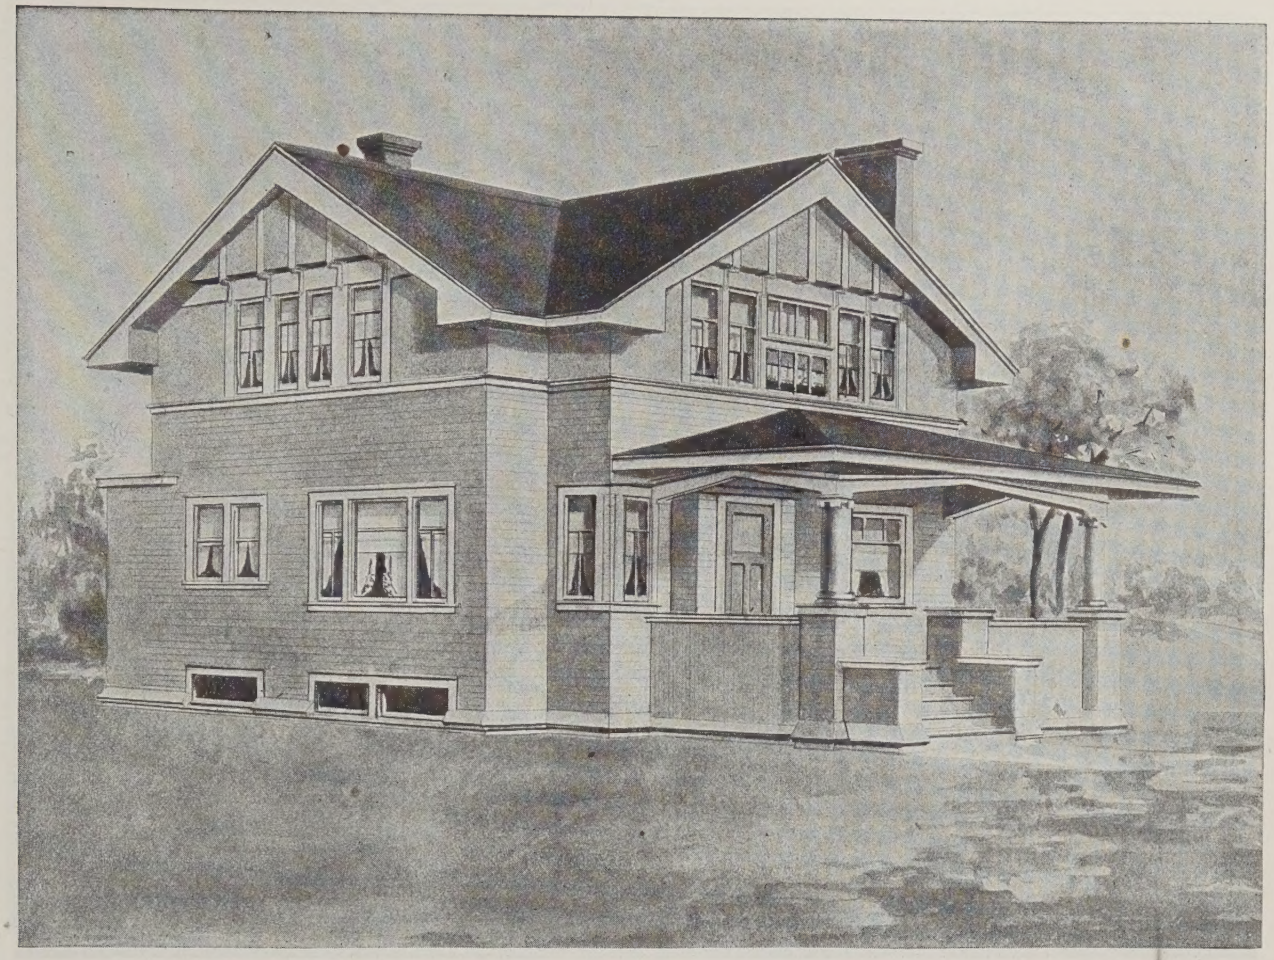
Some people are led astray by estimated costs, so called, when you know and we know that the only ones who know and who can give an accurate estimate are the people on the ground.

Don't Take the Word of an Outsider in the estimate of the cost of a house. At best he can only guess The figures he gives may be true of his locality but may be hundreds of dollars out of the way as far as your neighborhood is concerned.

Get Your Estimate from People Who Are on the Ground—People who have made a study of these things, people whose business it is to know all the facts, people who are your neighbors and will not mislead you either intentionally or unintentionally.

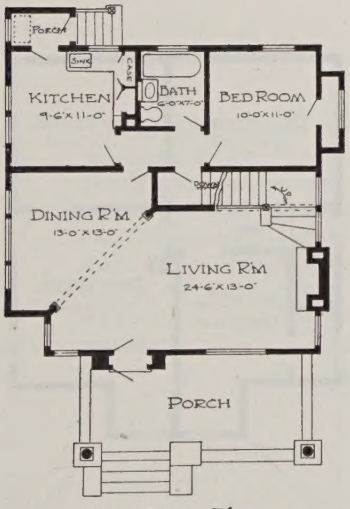
OUR GUARANTEE

THIS is right to the point and from the shoulder: If you do not find the plans exactly as represented, if you do not find them as accurate and as well prepared as those furnished by any architect in the world we will refund your money. You run no risk whatever under this guarantee. We make this guarantee strong to disabuse the mind of any person who has the idea that these plans are of the cheap and flimsy kind because they are sold at such a low price. Every set of plans sent out by this Association has been prepared by a licensed architect who has gained a high place in his profession as the creator of new ideas in home architecture and who has given many years to the study of American home builder's needs. Remember—you run no risk whatever. If you do not find the plans exactly as represented and as good as any you ever saw we will refund your money.



Design No. 7008

Size: Width, 31 feet 6 inches; Length, 29 feet, exclusive of porches



First Floor Plan

Blue prints consist of basement plan; roof plan; first and second floor plans; front, rear, two side elevations; wall sections and all necessary interior details. Specifications consist of about twenty pages of typewritten matter.

BY USING OUR

Blue Printed Working Plans

YOU WILL BE SURE TO GET
A HOUSE WITH ARTISTIC LINES.

HIGH CLASS BLUE PRINTS

AND

COMPLETE SPECIFICATIONS

WHY THEY SHOULD BE USED

They can be made the basis of contract between owner and contractor.

They will prevent mistakes, which cost money.

They will prevent disputes, which are unpleasant and never settled satisfactorily to both parties.

Time and money are saved by having on the job plans and specifications for the workmen to consult.

With them it will not be necessary to waste time waiting for the owner or contractor to direct the work.

It costs but little more to have a modern, convenient and pretty home, than an old style box house.

Any slight, unimportant changes which may be desired can be noted on the plan and entered in the book of specifications, thereby having a record.

They will save money for the material dealer, because the sizes of all openings are plainly specified, and there is no chance for error or dispute.

They will save many times their cost during the erection of any house.

A NEW BOOK OF NEW PLANS

All the plans illustrated in this book are new, modern and up-to-date in every particular. All of the houses have been especially designed by licensed architects, who stand at the head of their profession. The plans we furnish are guaranteed to be accurate and complete in every respect and will save many times their cost in the construction of the house.

HIGH CLASS BLUE PRINTS

AND

COMPLETE SPECIFICATIONS

Of What A Complete Set Consists

All plans are drawn one-quarter inch scale to the foot.

We use the best quality Electric Blue Print paper.

We furnish for a set of plans:

Front Elevation **Right Elevation** **Left Elevation**
Rear Elevation **All Floor Plans**
Cellar and Foundation Plans **All necessary details**

Specifications consist of 14 to 20 pages of typewritten matter, giving full directions for carrying out the work.

Both the plans and specifications are bound in cloth and heavy waterproof paper, in an artistic and substantial manner.

The plans and specifications are full, complete and accurate in every particular, and guaranteed.

Our equipment is so complete that we can mail out, the same day the order is received a plan of any house illustrated in this book.

Save Money By Using Our Blue Prints

The plans illustrated herein are prepared from information received from the thousands of members of this great architectural association, and the home builder is particularly fortunate in being able to secure at such low prices these plans, which have proven to be the most practical and most modern.

No house should be built except with the assistance of the complete plans and specifications. They save time and waste, and, therefore save money.

WHY OUR

BLUE PRINTS

AND

COMPLETE SPECIFICATIONS

ARE

HIGH CLASS

The blue prints and specifications which we offer you are high class and of such character that we can positively state that they are as complete and as accurate as those which would cost you $100. In fact these are $100 plans, and the only reason we can furnish them so cheaply, is because we divide the cost among so many. Every plan has been designed by a Licensed Architect. They are modern, practical, artistic and will enable you, should you build from them, to sell your property at a price which will not be a loss to you.

Remember everyone of the plans of houses we publish are drawn by Licensed Architects and every part of the work has been carefully examined, so that there will be no mistakes. There has been combined also economy in the construction with artistic designs.

SPECIAL DEPARTMENT

Special Plans at Half Price

In addition to the Regular Plans which we are furnishing in very large numbers all over the world, we are now doing an immense business in SPECIAL PLANS, and our charges are only one-half the price asked by other architects.

The work handled in our Special Department includes

City School Houses	Town Halls	Residences
Country School Houses	Lodge Halls	Cottages
Office Buildings	Churches	Stores
Bank Buildings	Hotels	Farm and Out Buildings
Factory Buildings	Libraries	Public Buildings (all kinds)

In our Special Department, which is under the superviston of Licensed Architects, we handle all kinds of architectural work. If you are unable to make a selection from the designs illustrated in this book, we will draw special plans for you, incorporating all of your own original ideas, and we will guarantee that the plans we furnish will be for a building entirely according to your requirements. Our whole organization is at your service. We have a corps of draughtsmen, and as we have the equipment and facilities for handling work of all kinds, we can get your plans out in the quickest time possible.

In this book we illustrate only low and medium priced houses, but in our Special Department we handle the finest work in addition to that of low and medium price.

Our aim is to please you. Remember our great organization is at your service.
